

SCOPE DOCUMENT

Project Title

Tamil Gaming Content Strategy Testing

1. Project Overview

This project focuses on analyzing the content strategy of the Tamil Gaming YouTube channel using manual testing and data analysis techniques. The objective is to evaluate video performance, viewer engagement patterns, content categories, thumbnail effectiveness, and overall channel strategy.

A dataset of 50 videos was collected and analyzed using structured testing methods. The project aims to identify strengths, weaknesses, opportunities, and strategy gaps that may impact channel growth and audience engagement.

The outcome of this project is a set of data-driven recommendations that can help improve content performance, viewer retention, and audience satisfaction.

2. Project Objectives

The primary objectives of this project are:

- Analyze video performance across different game categories.
 - Identify high-performing and low-performing content.
 - Evaluate viewer engagement using views, likes, and comments.
 - Assess thumbnail quality and consistency.
 - Examine upload patterns and content distribution.
 - Identify strategy gaps affecting channel growth.
 - Provide recommendations for content optimization.
-

3. Application Under Analysis

Channel Name: Tamil Gaming

Platform: YouTube

Content Type:

- Gaming Videos

- Gameplay Series
- Horror Games
- RPG Games
- Simulator Games
- Action Games
- Multiplayer Games

Dataset Size:

- 50 Videos
 - Thumbnail Audit Data
 - Engagement Metrics
-

4. Scope of Analysis

In Scope

The following areas are included within the project scope:

Content Performance Analysis

- Video views analysis
- Category-wise performance comparison
- Popular game identification

Engagement Analysis

- Likes analysis
- Comments analysis
- Engagement trend evaluation

Thumbnail Analysis

- Thumbnail readability
- Text visibility
- Face presence
- Visual attractiveness

Content Category Analysis

- Horror category performance
- RPG category performance
- Action category performance
- Simulator category performance
- Fun/Multiplayer category performance

Strategy Gap Identification

- Low-performing content
- Audience interest decline
- Content inconsistency
- Missed growth opportunities

Recommendation Generation

- Growth recommendations
 - Content optimization suggestions
 - Strategy improvement opportunities
-

5. Out of Scope

The following items are not included in this project:

- YouTube algorithm analysis
 - Revenue analysis
 - Subscriber analytics
 - Competitor channel benchmarking
 - Paid promotion analysis
 - External social media performance
 - Internal creator analytics dashboard data
-

6. Tools Used

The following tools were used during the project:

- Microsoft Excel
 - WPS Office Spreadsheet
 - Manual Data Collection
 - Manual Testing Techniques
 - Data Analysis Methods
-

7. Deliverables

The project will produce the following deliverables:

- Scope Document
- Test Plan
- Content Strategy Test Cases
- Strategy Gap Log

- Performance Analysis Report
 - Growth Recommendation Report
 - Supporting Evidence and Screenshots
-

PAGE 2

8. Methodology

The project follows a structured manual analysis approach:

Step 1 – Data Collection

Collected information from 50 Tamil Gaming videos including:

- Views
- Likes
- Comments
- Upload Dates
- Game Categories
- Game Names

Step 2 – Thumbnail Audit

Evaluated thumbnails based on:

- Readability
- Face Presence
- Text Presence
- Overall Visual Quality

Step 3 – Performance Analysis

Compared:

- Category Performance
- Video Performance
- Engagement Metrics
- Content Trends

Step 4 – Strategy Gap Identification

Identified:

- High-performing content opportunities
- Low-performing content risks

- Audience interest decline patterns
- Content distribution issues

Step 5 – Recommendation Preparation

Prepared actionable recommendations for improving:

- Viewer Engagement
 - Content Strategy
 - Upload Planning
 - Audience Retention
-

9. Expected Outcomes

The expected outcomes of this project include:

- Identification of top-performing content categories.
 - Detection of content strategy gaps.
 - Improved understanding of audience preferences.
 - Recommendations for increasing engagement.
 - Better content planning decisions.
 - Data-driven insights for channel growth.
-

10. Success Criteria

The project will be considered successful if it:

- Successfully analyzes all 50 selected videos.
 - Identifies measurable performance trends.
 - Detects strategy gaps supported by evidence.
 - Produces actionable recommendations.
 - Generates professional documentation suitable for portfolio presentation.
-

11. Conclusion

The Tamil Gaming Content Strategy Testing project aims to combine manual testing practices with content analysis techniques to evaluate the effectiveness of a gaming channel's content strategy. By analyzing video performance, engagement metrics, and content trends, the project provides valuable insights that can support informed decision-making and future channel growth.
