

TEST PLAN

Project Title

Tamil Gaming Content Strategy Testing

Document Version: 1.0

Prepared By: Bharath Roy

Project Type: Manual Testing & Content Strategy Analysis

1. Introduction

This Test Plan defines the testing approach, objectives, scope, methodology, resources, and deliverables for the Tamil Gaming Content Strategy Testing project.

The project focuses on analyzing video performance, viewer engagement, thumbnail effectiveness, and content strategy trends within the Tamil Gaming YouTube channel.

The purpose of this analysis is to identify content strategy gaps and provide recommendations that may contribute to improved channel growth and audience engagement.

2. Project Objective

The objective of this project is to:

- Analyze content performance across multiple game categories.
 - Evaluate audience engagement levels.
 - Assess thumbnail quality and consistency.
 - Identify content strategy gaps.
 - Generate actionable growth recommendations.
 - Apply manual testing principles to content analysis.
-

3. Scope

In Scope

Content Performance Testing

- Video view analysis
- Category-wise comparison
- Top-performing content identification

Engagement Testing

- Likes analysis
- Comments analysis
- Engagement trend evaluation

Thumbnail Testing

- Readability assessment
- Text visibility verification
- Face presence analysis
- Thumbnail quality review

Strategy Gap Testing

- Underperforming content detection
- Content inconsistency analysis
- Audience interest decline identification

Recommendation Analysis

- Growth opportunities
- Content optimization suggestions
- Improvement recommendations

Out of Scope

The following items are excluded:

- Revenue analysis
 - Subscriber analytics
 - YouTube algorithm analysis
 - Competitor benchmarking
 - Paid marketing campaigns
 - External social media platforms
-

4. Test Items

The following components will be tested:

Test Item	Description
Video Performance	Analysis of views across videos
Engagement Metrics	Likes and comments evaluation
Content Categories	Category-wise performance
Thumbnail Quality	Thumbnail effectiveness
Upload Patterns	Consistency evaluation
Strategy Gaps	Growth opportunity identification

5. Testing Methodology

The project follows a structured manual testing approach.

Phase 1 – Data Collection

Collect data from 50 Tamil Gaming videos including:

- Views
- Likes
- Comments
- Upload Dates
- Game Categories
- Game Names

Phase 2 – Data Validation

Verify:

- Data accuracy
- Category classification
- Video information consistency

Phase 3 – Content Analysis

Analyze:

- High-performing content

- Low-performing content
- Category performance

Phase 4 – Gap Identification

Identify:

- Strategy weaknesses
- Growth opportunities
- Audience preference trends

Phase 5 – Recommendation Generation

Prepare improvement recommendations based on findings.

6. Test Approach

The project uses:

Manual Analysis Testing

Activities include:

- Data review
- Trend analysis
- Category comparison
- Pattern identification
- Strategy evaluation

Exploratory Analysis

Used for:

- Discovering hidden trends
 - Identifying growth opportunities
 - Detecting performance anomalies
-

7. Entry Criteria

Testing will begin when:

- Data collection is completed.
- Video dataset is available.

- Categories are classified.
 - Thumbnail audit data is prepared.
-

8. Exit Criteria

Testing will be considered complete when:

- All 50 videos are analyzed.
 - Performance trends are documented.
 - Strategy gaps are identified.
 - Recommendations are prepared.
 - Final reports are generated.
-

9. Test Deliverables

The following documents will be produced:

- Scope Document
 - Test Plan
 - Content Strategy Test Cases
 - Strategy Gap Log
 - Performance Analysis Report
 - Growth Recommendation Report
 - Supporting Evidence
-

10. Risks and Mitigation

Risk	Impact	Mitigation
Limited dataset size	Medium	Use representative sample
Manual data entry errors	Medium	Perform validation checks
Trend interpretation bias	Medium	Use data-driven findings
Incomplete information	Low	Cross-check source data

11. Metrics Used

The following metrics will be analyzed:

Performance Metrics

- Total Views
- Average Views
- Category Performance

Engagement Metrics

- Likes
- Comments
- Engagement Rate

Thumbnail Metrics

- Readability Score
 - Face Presence
 - Text Presence
 - Visual Rating
-

12. Test Environment

Platform:

- YouTube

Channel:

- Tamil Gaming

Tools:

- Microsoft Excel
 - WPS Office
 - Manual Analysis Techniques
-

13. Expected Deliverables

At project completion, the following outputs are expected:

- Performance Insights
 - Category Performance Analysis
 - Engagement Findings
 - Strategy Gap Identification
 - Growth Recommendations
 - Professional Documentation
-

14. Approval
